You may customize myPCC. To make changes, select Content Layout link at the top right.

This will take you to Manage Content/Layout. From here, you may move, add or delete a channel.

Note, you may only delete or move channels with that option. If the “X” (delete) or arrow (move) is grayed out, you may not perform that operation.

To add a new channel, select the New Channel button. Choose a category, then chose a channel. Hit “Add Channel”. This will take you back to the Manage Content/Layout screen. You may move the new channel as needed. Once finished, select the “Back to . . .” link.
