Student Learning Objectives (SLO's)

Graduates of the program will:

1. Model ethical, legal and professional values and beliefs congruent with the profession in all practice settings.

2. Develop therapeutic programs to meet established goals based on acquired knowledge, published research, and practical experiences.

3. Demonstrate clinical reasoning skills during client centered interventions through innovative strategies.

4. Provide culturally competent care to individuals in a variety of settings.

5. Professionally interact within an interdisciplinary team and demonstrate core competencies that are required by the profession in order to practice with diverse populations.
